IITE is in the forefront in preparing skill and technology-based professionals; it has trained thousands of students in various fields for enabling the students to mark a pride place in highly competitive global economy.

Capable to achieve higher goals

It was instrumental in bringing computer education within the reach of a common man & was responsible for adding professional skill sets to lacs of students, making them capable to achieve higher goals in life and become successful, not only locally but also globally.

Online Training

With powerful new tools like learning management systems, building online training courses is easy. Our Online Training Library of courses helps you to get the training you need at times that are convenient for you. Online Training is delivered over the web to let you proceed at your own pace, anytime and anywhere.

Experienced Trainers

Experienced educators. The abilities to convey a message should only be surpassed by a deep knowledge of your field. Organizational skills and a positive attitude are important qualities that We possess. Our goal is to promote efficiency and competitive advantage by developing the skills of personnel.

Certification

Gain practical skills you can use on the job. Realize maximum benefit from a wide range of expertise areas. Our company independent certification teaches you all aspects of a specific type of career pursuit while also providing organization with a standard of assured excellence from these professionals.

Job Support

Potential employees should have the technical know-how and the right academic qualifications. Therefore our company supports you to excel in the career you are already following, and help developing skills, and where you stand and find a way to polish the areas you are not doing so well in.

LIFE-SKILL EDUCATION

Personality Development

At IITE we believe in bringing the best out of each of our students and getting them geared up for the challenges that lie ahead. In today's highly competitive world it is very important to stand out in the crowd. A good personality helps in both the professional as well as Personal arenas. The impact that a good personality has is unparalleled. The course has been developed as an amalgamation of distinguished features, which can help the learners to experience a revolution in the way they think of themselves as individuals and the way they approach things in their daily life, thereby introducing a revolutionary change in their life.

The course has been designed with two major objectives, to help you understand your own capabilities and to bring them out in front of the whole world. The course content has been designed to help you emerge as a more confident person with the personality of a leader.

Business Communication

In the professional arena, one thing that gives you a chance to stand out in the crowd of business professionals is your command over Business Communication. It can help you reach new heights in a professional arena.

The course has been developed to help you grasp the basics of business Communication and to master it for an evolved communication with others around you in a professional environment. It helps you gain confidence and understand the intricacies involved in business communication.

Attitude Development

An attitude usually refers to a set of behaviours, beliefs, and emotions towards a specific event, thing, person or object. They are usually a result of an individual's upbringing as well as experience and their influence on the behaviour is very powerful. Even though attitudes are enduring, they can also undergo changes.

The course would be guiding you regarding the ways in which you should behave in specific situations, the ways in which certain issues can be handled and the ways in which you can develop yourself as a human being in a complete way. Such life skills are mostly ignored and they are usually not taught to the students during their academic years in any college or school but as the people grow they come to realise that these are in fact the life tools that would help in the establishment of the paths for their future career and also their complete personality in the years to come.

Self Management

Self Management theory states that when we focus our attention on ourselves, we evaluate and compare our current behaviour to our internal standards and values.

- | | |
|--|---|
| -Personality Traits | -Key understanding about self -development. |
| -Personal values | -Identifying and oneself |
| -Habits | -Developing self -development goals/plan |
| -Emotions | -Creating and practising positive attitude. |
| -Psychological Needs | -Understanding and achieving success. |
| -Self- knowledge is the beginning of self- employment. | -Managing yourself with time management |
